QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor:
R. C. SUTCLIFFE

Vol. 97, 1971

ROYAL METEOROLOGICAL SOCIETY
CROMWELL HOUSE, HIGH STREET, BRACKNELL, BERKS.
1971

J. T. HOUGHTON and G. E. HUNT—The detection of ice clouds from remote measurements of their emission in the infra-red 1

I. E. GALBALLY—Ozone profiles and ozone fluxes in the atmospheric surface layer .. 18

I. VERGEINER—An operational linear lee wave model for arbitrary basic flow and two-dimensional topography 30

E. C. KUNG—A diagnosis of adiabatic production and destruction of kinetic energy by the meridional and zonal motions of the atmosphere 61

Shorter Contributions—

C. D. WALSHAW, G. M. B. DOBSON and B. M. F. MACGARRY—Absorption coefficients of ozone for use in the determination of atmospheric ozone 75

D. B. B. POWELL—The absorption coefficients of ozone for the Dobson spectrophotometer: a direct determination of their ratios and temperature dependence 83

J. K. ANGELL, D. H. PACK, W. H. HOECKER and N. DELVER—Lagrangian-Eulerian time scale ratios estimated from constant volume balloon flights past a tall tower .. 87

R. THOMPSON—Numeric calculation of turbulent diffusion 93

A. J. FORBES and R. A. HAMILTON—Clear sky radiation measurements at Lerwick .. 99

T. S. S. ANJANEYULU—Estimates of kinetic energy over the Indian monsoon trough zone 103

R. R. BROOK—Fluxes of momentum and mass from 2 km to 28 km at Laverton, Victoria, during the serial sounding experiment, Spring 1966 110

R. DAWSON and W. C. A. HUTCHINSON—Electrification accompanying the freezing of water 118

R. RAYMENT and C. J. READINGS—The importance of instrumental tilt on measurements of atmospheric turbulence 124

Discussions—

H. R. PHILLPOT—Antarctic stratospheric warming reviewed in the light of 1967 observations (*Q.J.*, **95**, p. 329) 131

W. NORDBERG, J. CONAWAY and P. THADDEUS—Microwave observations of sea state from aircraft (*Q.J.*, **95**, p. 408) 132

H. R. PRUPPACHER and K. V. BEARD—A wind tunnel investigation of the internal circulation and shape of water drops falling at terminal velocity in air (*Q.J.*, **96**, p. 247) .. 133

Proceedings at meetings of the Society 135

Reviews—

Annual Report on the Meteorological Office, 1969 (H.L.P.); *History of hydrology*, Asit K. Biswas (J.S.G.McC) 137

B. J. HOSKINS—Atmospheric frontogenesis models: some solutions 139

R. R. ROGERS—The effect of variable target reflectivity on weather radar measurements 154

D. A. HAUGEN, J. C. KAIMAL and E. F. BRADLEY—An experimental study of Reynolds stress and heat flux in the atmospheric surface layer 168

F. DELSOL, K. MIYAKODA and R. H. CLARKE—Parameterized processes in the surface boundary layer of an atmospheric circulation model 181

T. G. DOPPLICK—The energetics of the lower stratosphere including radiative effects 209

Shorter Contributions—

P. J. EVERSON and D. R. DAVIES—A note on the dependence of atmospheric predictability on baroclinic development 238

K. V. BEARD and H. R. PRUPPACHER—A wind tunnel investigation of collection kernels for small water drops in air 242

J. W. HUTCHINGS and E. FARKAS—The vertical distribution of atmospheric ozone over Christchurch, New Zealand 249

Correspondence—

F. K. ODENCRANTZ and P. ST.-AMAND—Comment on a paper by J. Latham and C. P. R. Saunders, ' Experimental measurements of the collection efficiencies of ice crystals in electric fields ': Reply by J. LATHAM and C. P. R. SAUNDERS 255

Discussions—

D. N. Axford—An observation of gravity waves in shear flow in the lower stratosphere (*Q.J.*, **96**, p. 273) 256

W. T. Roach—On the influence of synoptic development on the production of high level turbulence (*Q.J.*, **96**, p. 413) 256

K. A. Browning, T. W. Harrold and J. R. Starr—Richardson number limited shear zones in the free atmosphere (*Q.J.*, **96**, p. 40) 257

Proceedings at meetings of the Society 259

Obituary Notices 262

P. V. Hobbs—Simultaneous airborne measurements of cloud condensation nuclei and sodium-containing particles over the ocean 263

S. R. Shewchuk and J. V. Iribarne—Charge separation during splashing of large drops on ice 272

K. A. Browning—Structure of the atmosphere in the vicinity of large-amplitude Kelvin-Helmholtz billows 283

G. D. Robinson—The predictability of a dissipative flow 300

Shorter Contributions—

D. N. Axford—Spectral analysis of an aircraft observation of gravity waves 313

C. M. R. Platt and D. J. Gambling—Emissivity of high layer clouds by combined lidar and radiometric techniques 322

P. A. Taylor—A note on the log-linear velocity profile in stable conditions 326

T. W. Harrold and K. A. Browning—Identification of preferred areas of shower development by means of high power radar 330

A. Gilchrist—An example of synoptic development in a general circulation model .. 340

Correspondence—

R. R. Brook—Heat fluxes from the Laverton Serial Sounding Experiment 348

A. C. Pike—Comments on a paper by J. R. Bates ' Dynamics of disturbances on the Intertropical Convergence Zone ' 351

Report of the Council for 1970 352

Proceedings at meetings of the Society 364

Reviews—

Geophysical fluid dynamics, Vol. 1 (J.S.T.); *Climate and weather*, J. A. Day and G. L. Sternes (M.V.J.) 365

Obituary Notice 367

F. Pasquill—Atmospheric dispersion of pollution—Presidential Address 369

P. R. Owen—Buildings in the wind—Symons Lecture 396

A. S. Thom—Momentum absorption by vegetation 414

C. O. Hines—Generalizations of the Richardson criterion for the onset of atmospheric turbulence 429

A. J. Illingworth—The variation of the electric field after lightning and the conductivity within thunderclouds 440

S. Petterssen and S. J. Smebye—On the development of extratropical cyclones .. 457

J. A. Garland—Some fog droplet size distributions obtained by an impaction method 483

M. H. Smith, R. F. Griffiths and J. Latham—The freezing of raindrops falling through strong electric fields 495

R. J. Cole—Hysteresis effects in a differentially heated rotating fluid annulus .. 506

J. E. Harries and W. J. Burroughs—Measurements of submillimetre wavelength radiation emitted by the stratosphere 519

Shorter Contributions—

T. Thompson—The basic data set project for GARP planning 537

J. Warner—Observations of the eddy fluxes of heat and vapour over the sea .. 540

H. R. Oliver—Wind profiles in and above a forest canopy 548

R. E. Dickinson—Cross-equatorial eddy momentum fluxes as evidence of tropical planetary wave sources 554

A. H. Gordon—Eddy kinetic energy spectra in the Middle East sub-tropical and easterly tropical jet streams 559

J. B. Stewart—The albedo of a pine forest 561

J. J. Landsberg and A. S. Thom—Aerodynamic properties of a plant of complex structure 565

T. L. Ogden and K. O. L. F. Jayaweera—Drag coefficients of water droplets decelerating in air 571

Correspondence—

N. R. Gokhale and K. M. Rao—Comments on ' The analysis of a hailstone ' by W. C. Macklin, L. Merlivat and C. M. Stevenson 575

D. R. Lane-Smith—A warm thunderstorm 577

Discussions—

J. S. A. Green—Transfer properties of the large-scale eddies and the general circulation of the atmosphere (*Q.J.*, **96**, p. 157) 579

J. S. Sawyer—Observational characteristics of atmospheric fluctuations with a time scale of a month (*Q.J.*, **96**, p. 610) 581

C. D. Rodgers—Remote sounding of the atmospheric temperature profile in the presence of cloud (*Q.J.*, **96**, p. 654) 582

L. M. Hocking and P. R. Jonas—The collision efficiency of small drops (*Q.J.*, **96**, p. 722) 582

J. T. Bartlett—The effect of revised collision efficiencies on the growth of cloud droplets by coalescence (*Q.J.*, **96**, p. 730) 583

Proceedings at meetings of the Society 584

Reviews—

World survey of climatology, Vol. 14, *Climate of the Polar regions*, S. Orvig (R.A.S.R.); *The practice of weather forecasting*, P. G. Wickham (R.A.S.R.) 591

Index and Contents Pages 593
